

## OPTICAL SET

### ONE OF MOST IMPORTANT ADVANTAGE

### MAX *DRILLING POWER* MOLES IS HIGH PRECISION.

To take full advantage of the machine in this area is required to precisely adjust the machine at the start of jacking. With Optical Set we can precise adjustment the machine in the start pit.

Optical Set TERMA is solid and durable construction. The cover of optical elements made from solid metal, which protect it from any damage.

The base is made of aluminum bracket, which greatly increases the resistance to unexpected circumstances at the site.

Terma is an european leading manufacturer of machines for trenchless technology, commonly called moles, ground rockets. We offer machines and accessories for making all kinds of installation: water, gas, electrical, data communications and other installation using PE/PVC pipes diameter up to 220 mm and steel pipes diameter up to 711 mm.
